What students said about Credit When Credit is Due.

This course is Really going to help change my life. It Really puts things into perspective for me. It Really taught me how to budget my income.

I actually have some knowledge to start paying and fixing my credit and debt issues.

What students said about Make Your Move a Guide to Homeownership:

This home course was significant to me. It provided valuable insights and experiences that deepened my understanding of various topics. The lessons I learned were not only academically enriching but also personally transformative. Throughout the course, I gained new perspectives that will stay with me long after it ends. It was a rewarding journey that allowed me to grow both intellectually and emotionally, making it an unforgettable part of my education and for my future.

Very helpful (to) understanding a lot of information that is needed. I've never owned a home and do not have parents or guidance to the knowledge of owning and maintaining a home. So this was very helpful on that end as well.
